SUMMARY

Motivated Information Technology student at Singapore Polytechnic, specialising in Cybersecurity, with hands-on experience in full-stack web development, automated testing and secure authentication. Having built two web applications using Node.js, Express.js, PostgreSQL and MySQL, including leading a team of 4 on a marketplace project, I am now looking for an internship to apply my skills and learn from experienced engineers.

Though I am still a student, I bring a willingness to take on unfamiliar challenges, from hackathons to student-led workshops, along with teamwork, responsibility and a keen interest in building secure software.

EDUCATION

Singapore Polytechnic – Diploma in Information Technology (Cybersecurity specialisation)

April 2025–April 2028

- Relevant modules (Grade A): Back-End Web Development, Continuous Integration and Continuous Delivery, Programming for Data Science, Ethical Hacking Essentials

Foreign Secondary School - Pearson Edexcel International GCSE

June 2017-Nov 2023

- Grade 9 in Further Pure Mathematics, Mathematics, Chemistry, Physics and Biology
- Grade 7 in First Language English (Results available on request)
- SAT: 1330 (Math 700, Reading and Writing 630), March 2025

PROJECTS

GitMart: Full-Stack Marketplace Application | Team Leader, Team of 4

May 2026–Aug 2026

Node.js, Express.js, PostgreSQL, JWT, Jest, Playwright, GitHub Actions
A marketplace where users list items and request reservations from sellers.

- Led a team of 4, reviewing teammates' pull requests and resolving merge conflicts to keep the main branch stable.
- Built user registration, login and profile with JWT authentication, plus listing APIs and pages with owner-only edit and delete, search, sorting and image uploads.
- Built the listing lifecycle and reservation workflow using PostgreSQL transactions and row locking, with 43 Jest unit tests, 17 integration tests and 5 Playwright tests.

Magical Academia: Gamified Wellness Platform | Solo Project

Jan 2026-Feb 2026

Node.js, Express.js, MySQL, JWT, bcrypt, Bootstrap
A web app where users complete wellness challenges to earn points, unlock spells, join competitions and climb leaderboards.

- Built a REST API with a routes, controllers and models structure, using bcrypt password hashing, JWT authentication and creator-only access to challenges.
- Developed the gamification features (points, spells, competitions and leaderboards) with a dynamic Bootstrap frontend, and documented setup and endpoints in a README.

HDB Resale Price Analysis | Solo Project

July 2026–Aug 2026

Python, pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

- Cleaned and merged four data.gov.sg datasets (236,000+ rows) using pandas, converting dates and data types, standardising values and creating new fields such as price per square metre.
- Analysed price, demand and supply trends with groupby and merge, and visualised the results with Seaborn and Matplotlib.

TECHNICAL SKILLS

Programming & Web

- Languages: JavaScript, Python, SQL
- Web: HTML, CSS, Bootstrap, Node.js, Express.js, REST APIs

Databases & Data

- Databases: PostgreSQL, MySQL
- Data processing: pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

Testing, Tools & Security

- Testing: Jest, Playwright, Postman
- Tools: Git, GitHub, GitHub Actions, ESLint, Prettier
- Security: JWT, bcrypt, Burp Suite, Wireshark, Kali Linux

WORK EXPERIENCE

Banquet Service Crew (Part-time), The Westin Singapore **May 2025 - May 2026**

- Served 20+ guests per shift at wedding and corporate events, and occasionally trained new crew members.

LEADERSHIP AND ACTIVITIES

Gryphons, SP Cybersecurity Interest Group - Publicity Subcommittee Member **AY2026/27**

- Created social media posts for events, and prepared the Burp Suite segment on Proxy, Repeater and parameter tampering for Year 1 students at the CyberBlitz Web Exploitation Workshop.

Singapore Polytechnic - Deputy Class Representative **AY2026/27**

- Relayed updates between lecturers and classmates and helped coordinate class matters.

SP Freshmen Orientation Programme - Organising Member, Group Leader **AY2026/27**

- Led a group of 17 freshmen and helped organise orientation activities across multiple events.

World Robot Olympiad Singapore Nationals - Robo Mission Elementary Judge **AY2026/27**

- Scored performances against competition criteria and checked robots for size compliance.

Other involvement:

- **SP International Students' Club, Senior Committee Member** **AY2025/26**
- **SP x NP ASEAN Spark 2025, Organising Member** **AY2025/26**
- **Celebrate Christmas in Singapore, Community Service Volunteer, 4 days** **AY2025/26**

HACKATHONS AND TECHNICAL ENGAGEMENT

SP PolyFinTech100 API Hackathon - Semi-Finalist **AY2026/27**

- Contributed ideas for the team's app concept, reaching the semi-finals.

SFYC Innovators Bootcamp (Syfe Ideathon), Singapore Fintech Association's Youth Chapter - Participant **AY2025/26**

- Co-developed and pitched SyfeBot, a chatbot-led investing concept for 17 to 20 year olds, combining personalised news, micro-courses and gamified rewards.

SP x Autodesk Singapore Hackathon - Participant **AY2025/26**

AWARDS

- **Pearson Excellence Award / Certificate of Excellence**
- **CCA Grade: Gold, Singapore Polytechnic**

CERTIFICATIONS

- **Building with the Claude API**
- **Claude Code in Action**
- **Introduction to Agent Skills**
- **Introduction to Model Context Protocol**

LANGUAGES

Burmese (Native) **English (Fluent; IELTS Overall Band 7.0, CEFR C1)** **Mandarin (Elementary)**
